Height: 52 cm

Weight: 23,5kg

Health:

HD A/A ED 0/0

PRA normal/clear

CEA free

JADD normal

Eye check ECVO 4 Sept 2014

Ashkii is a solidly healthy, happy dog, who has up to now never had an illness, nor problems with eyes, ears, or digestion.

Disposition, Being, Character:

He is a strong male with a lot of stamina, and who travels with us over hill and dale. On our trips with the motor home, he also moves safely in the big city bustle. Ball games, jumping around in the water, swimming and frolicking in the snow are his favourite things to do. In the house he is affectionate and cuddly, but can also be left alone without problems. He loves children and he is good with other dogs. Strangers are met with curiosity but also with friendliness.

Condition:

10 June 2012 He is a "Toller" with great temperament, very playful, confident in optical and acoustic events, is sensitive when he hears gunshot*. He has all the Retriever qualities.

* Gunshots are no problem, he has been trained to think: gunshot = "Sit"
